

PUBLIC WORKS DEPARTMENT

MAYOR: Lauren McLean | DIRECTOR: Stephan Burgos

Public Works Hillside Preapplication Questionnaire

Property Address:

Yes No

- Is this an empty lot in a new subdivision?
- Will there be new landscaping?
- Will the project involve any new footings/foundations?
- Retaining walls? If yes, please complete the retaining walls section.

Project Description:

Retaining Walls:

No Yes – Type:

If yes, what is the tallest point of the wall:

No Yes – Will there be multiple walls with less than 10 ft of space between them?

Proposed Drainage Method:

The City of Boise's stormwater policy requires that all stormwater is either managed on the property or is directed to a shared subdivision system. Not all projects will trigger this requirement. Any project adding 1,000 square feet or more of hard surfaces must include a stormwater mitigation system designed by a qualified licensed professional.

- Less than 1000 sf of hard surfaces or landscaping proposed
- Connect to Subdivision drain system (available in most new hillside subdivisions)
- Retain on-site (typical landscaping depressions, French drains, etc)
- Unsure
